-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese patent to Matsushita.
3. The patent to Matsushita discloses a closed loop vacuum cleaner for cleaning a floor surface comprising a foot portion 12 containing an expanded chamber 26 therein, said foot portion further including an intake nozzle 18 and an outlet nozzle (part of 27) directed toward said chamber; a managing unit containing a handle 14 and support wheels 13; a motor driven fan 11 for creating air flow, said motor driven fan being supported by said managing unit and being connected to said intake nozzle and said outlet nozzle to form a closed loop air system with said expanded chamber, and means within said closed loop air system 19,20,24 for filtering dirt and pollutants from the air within the system, wherein said filtering means includes a low aerodynamic resistant high air stream velocity centrifugal filter.

Allowable Subject Matter

4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1744

5. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 2, the prior art does not disclose nor render obvious the claimed combination of subject matter, particularly the cross section of said outlet nozzle is larger than the cross section of said intake nozzle. All of the prior art that are closed loop systems disclose the outlet having a smaller cross-sectional area. What applicants are doing is antithetical to what the prior art discloses.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Krymsky et al. (applicants' own work) shows another closed loop system.
